

MAIN ENTRY

COMMUNITY PRIORITY #3

DESIGN FROM COMMUNITY INPUT

Design concepts include three themes:

Inviting – Provide a clear front door and welcoming plaza.

Secure – Base of solid material. Entry is designed to maximize visibility & monitoring.

Red Oak Style – Use of traditional materials with a contemporary expression.

Three concepts were developed. The design below was selected because it reflects the Red Oak community and is the best use of tax dollars.

The roof plane extends out to create an inviting, shaded space to gather and has a more residential feel to compliment the surrounding neighborhoods. This main entry design creates a “Front Porch” to the school. It also provides natural light and visibility to improve security along with high ceilings for a more welcoming appearance.
